Nutraceuticals industry one of the biggest beneficiaries of GST reforms: Piyush Goyal

(Gns). Hailing the GST Council's decision on the rate cut, Union Commerce and Industry Minister Piyush Goyal said the nutraceuticals industry is one of the biggest beneficiaries of the transformational changes.

Addressing the Bharat Nutraexpo 2025, the minister said the reduction in GST rates will provide a tremendous and unprecedented boost to consumption demand.

Nutraceuticals are food products, or their components, that offer health benefits beyond basic nutrition, bridging the gap between food and medicine.

He noted that the industry can now aspire for a much greater volume of sales, creating a win-win situation for all, and further emphasised that businesses will gain from larger opportunities, while the entire GST benefit will be passed on to consumers.

In his address, Minister

Goyal urged the industry to ensure that every rupee saved through the GST reduction is passed on to consumers. He emphasised that under the new structure, GST on several categories has been reduced to as low as 5 per cent, resulting in substantial savings across the sector.

He noted that this will act as a strong demand booster, as lower prices naturally drive higher consumption and accelerate industry growth.

The Minister called upon industry leaders to

make a twin commitment to Prime Minister Narendra Modi — First, to ensure that every rupee saved from GST reductions is

growth story. Every product made in India, he underlined, reflects the aspirations of 1.4 billion citizens and embodies the country's journey toward Viksit Bharat 2047. Highlighting India's strong economic performance, he noted that the GDP grew by 7.8 per cent in the first quarter, despite global challenges and uncertainty.

He reaffirmed that India remains the fastest-growing large economy and, under the decisive leadership of Prime Minister Narendra Modi, will continue to lead global growth for the next two decades. Reiterating the government's vision of taking India's GDP from USD 4 trillion to USD 30 trillion by 2047, he stressed that Viksit Bharat 2047 is a collective national commitment. It is, he said, the responsibility of every citizen to contribute to this transformative journey of Amrit Kaal.

BJP Picks Tamil Powerhouse C.P. Radhakrishnan for Vice-Presidential Race

(Gns). The BJP-led National Democratic Alliance (NDA) has made a strong entry into the race for the upcoming Vice-Presidential election by nominating C.P. Radhakrishnan, a senior leader from Tamil Nadu. The decision has drawn attention across political circles in the state, signaling the BJP's focus on experience, leadership, and recognition of hardworking individuals.

The election for Vice-President is scheduled for September 9th, with the last date for filing nominations on August 21st. The election follows the resignation

of incumbent Vice-President Jagdeep Dhankhar on July 21st due to health reasons.

The BJP-led National Democratic Alliance (NDA) nominated C.P. Radhakrishnan, the Governor of Maharashtra with experience as a two-time MP from Coimbatore, for the Vice-Presidential election scheduled for September 9th, after Jagdeep Dhankhar's resignation on July 21st. This decision, emphasizing Tamil culture and leadership, was

determined by the BJP's Parliamentary Board and supported by NDA leaders, including Janata Dal (United) and Telugu Desam Party, and is viewed as a strategic move against the DMK.

The decision to nominate C.P. Radhakrishnan, currently the Governor of Maharashtra, was taken by the BJP's Parliamentary Board, the party's highest decision-making body.

The BJP's nomination of C.P. Radhakrishnan is being seen as a tribute to

Tamil culture and its hardworking people. The party and Prime Minister Narendra Modi have consistently promoted Tamil heritage, from recognizing Tamil as a primary language at the Kashi Tamil Sangamam to highlighting it on national and global platforms. PM Modi has also referred to Tamil as the world's oldest language.

The BJP has a history of honoring talent. The party nominated Dr. A.P.J. Abdul Kalam, one of Tamil Nadu's most respected figures, as President of India, even though the DMK-Congress alliance reportedly did not support his second term.

Chief Minister Shri Bhupendra Patel Holds Dialogue With Leading Industrialists and Organisations in Delhi to Promote Vibrant Gujarat Regional Conference

Gandhinagar, 04 September 2025: Chief Minister Shri Bhupendra Patel stated that the Vibrant Gujarat Regional Conference, to be held under the guidance of Prime Minister Shri Narendra Modi, will showcase the unique industrial potential, economic strengths, and cultural heritage of different regions of the state on a wider scale. The CM was addressing the interactive session and roadshow organised in New Delhi with leading industrialists and officials from industrial organisations for the promotion of the Vibrant Gujarat Regional Conferences. The CM mentioned that Vibrant Gujarat, a confluence of trade and tradition, commerce and culture, industry and entrepreneurship, has become the growth engine

of the country's development through the Vibrant Summit, inspired by Prime Minister Shri Narendra Modi. The idea of launching the Vibrant Gujarat Global Investors Summit in 2003 proved to be a game-changer for the state's holistic development. With the remarkable success of this summit over the past two decades, Gujarat today

has become the most industrialised and urbanised state in the country, and the most preferred investment destination for investors.

The CM added that the Prime Minister has given a vision of inclusive development for every person and every region. To realise this vision and build on the success of the Vibrant Gujarat

Summit, the state is now launching Regional Vibrant Conferences to accelerate industrial and economic growth at the regional level. In this context, the CM stated that the production and output of certain regions of Gujarat surpass those of several states in the country. These Regional Conferences will create new opportunities for sector-specific investments in North Gujarat, South Gujarat, Saurashtra, and Central Gujarat, setting a new direction for futuristic development. He also mentioned the role of special industrial parks such as PM MITRA Park, Bulk Drug Park, Medical Device Park, and Agro Food Park, which are being developed in the state as part of broader regional development prospects.

Rahul Gandhi Slams Modi, MP Govt Over Rat Bite Deaths Of Two Infants

(Gns). Two newborns admitted to the paediatric surgery ward of Maharaja Yashwantrao Hospital in Indore died recently after being bitten by rats, triggering outrage and strong criticism from the Opposition.

Congress leader Rahul Gandhi on Thursday called the incident "outright murder," blaming poor management at the government-run hospital and accusing both the Centre and the Madhya Pradesh government of gross negligence.

Two newborn infants died in the paediatric surgery ward of Indore's Maharaja Yashwantrao Hospital after being bitten

by rats, prompting strong criticism, with Rahul Gandhi calling it outright murder and citing government negligence. The hospital suspended staff and launched an investigation after admitting lapses in safety, while an NGO demanded an independent inquiry.

"This is no accident, this is outright murder. The incident is so horrific, inhuman, and insensitive that even hearing about it sends shivers down the spine. A mother has been robbed of her

child simply because the government failed to fulfil its most basic responsibility," the Leader of Opposition in Lok Sabha wrote in Hindi on X.

The infants were bitten on the night of August 30-31—one on the hand, the other on the shoulder. One of them, weighing just 1.2 kilograms, died on Tuesday.

Doctors cited congenital complications and severe infection as the primary cause but admitted that the rat bites further worsened the condition. The second

infant died on Wednesday.

The hospital administration suspended staff members responsible for the children's safety and launched an investigation. Dr. Arvind Ghanghoria, Dean of MGM Medical College, acknowledged lapses in safety protocols and said a high-level committee has been formed to probe the matter.

Rahul Gandhi questioned the repeated promises of inquiries, stating: "When you can't even ensure the safety of newborn children, what right do you have to run the government? PM Modi and the Chief Minister of MP should hang their heads in shame."

Haryana Govt directs all departments to promptly dispose of surplus, unserviceable materials

Chief Secretary Anurag Rastogi, who also holds the charge of Additional Chief Secretary, Finance, has issued a letter in this regard.

(Gns). The Haryana Government has directed all departments, boards, and corporations to immediately initiate action for the disposal of surplus and unserviceable material.

Chief Secretary Anurag Rastogi, who also holds the charge of Additional Chief Secretary, Finance, has issued a letter in this regard. The letter stated that to ensure financial discipline and optimal use of resources, it is necessary to declare such surplus and unserviceable material as

unserviceable in time and dispose of it accordingly.

For this purpose, the required indent should be sent to the Directorate General, Supplies and Disposals, or the Deputy Commissioner concerned, as per the government's policies and guidelines. Before declaring material unserviceable and starting its disposal process, approval from the competent authority must be obtained.

According to an official statement, the complete

details of surplus or unserviceable government material pending for disposal must be submitted in the prescribed format to the Directorate of Supplies and Disposals, Haryana. This information should clearly mention the type of material, year of purchase, quantity, purchase price, current condition, and other remarks.

The statement further added that an initial action taken report must be submitted within 30 days of the issuance of this letter, fol-

lowed by regular quarterly progress reports. These instructions should be brought to the notice of all officers and employees concerned, and compliance should be ensured with immediate effect.

The government has taken note that a large quantity of surplus, unserviceable, and obsolete material is lying in various departments, boards, and corporations. Keeping such material for a long time not only blocks valuable storage space but also increases the risk of assets getting damaged. Moreover, public funds also remain unnecessarily blocked, which could otherwise be used for more productive purposes.

powering Aatmanirbhar Bharat (self-reliant India)." Union Health Minister and BJP President JP Nadda said that the reduced tax rates will enhance ease of living and help families manage costs.

BJP Delhi President Virendra Sachdeva said the promise made by PM Modi during his Independence Day address has now been fulfilled, with household items becoming cheaper. Maharashtra CM Devendra Fadnis lauded the move to remove the 12 per cent and 28 per cent GST slabs, calling it "historic."

BJP calls MPs to Delhi for Vice-Presidential election

(Gns). The Goods and Services Tax (GST) Council's recent decision to overhaul the indirect tax regime elicited varied responses from both the ruling and opposition parties on Thursday. The council, chaired by Finance Minister Nirmala Sitharaman, on Wednesday approved a dual tax rate structure of 5 per cent and 18 per cent, effective September 22, simplifying the existing four-tier structure.

The BJP and its allies hailed the decision as a "big gift" for the middle

class. Prime Minister Narendra Modi stated that the GST reforms aim to ease living for the common man and strengthen the economy. Union Home Minister Amit Shah described the decision as "historic," saying it will bring "huge relief" to the poor, middle class, farmers, MSMEs, women, and youth.

Union Commerce and Industry Minister Piyush Goyal, welcoming the new reforms, shared a post on X stating that the GST Council's decision is aimed at promoting ease of living and supporting farmers,

MSMEs, the middle class, women, and youth. "PM Narendra Modi ji's historic Diwali gift for all! Heartiest congratulations to PM Modi ji and FM Nirmala Sitharaman ji on the introduction of the Next Gen GST reforms, duly supported by the GST Council in line with the Union Government's proposals on GST rate cuts and reforms," he said.

Railway Minister Ashwini Vaishnav wrote on X, "Historic Next-Gen GST Reforms. PM Narendra Modi Ji's gift for the coming festival season—cutting costs, easing lives, and

Rescue teams face challenges in quake-hit Afghan provinces

Communication and connectivity issues are major challenges being faced by humanitarian aid workers in the earthquake-hit provinces of Afghanistan, according to the United Nations.

Meanwhile, members of the Hindu and Sikh communities from Afghanistan have pooled in their resources to send relief material for the earthquake-affected victims in the eastern provinces of the country, added reports.

Manjit Singh Lambe, the president of the Council of Hindu and Sikh Minorities of Afghanistan, told Pajhwok news that the Sikhs of Afghanistan, in coordination with the diaspora residing abroad and the World Hindu Association, have sent humanitarian aid for the earthquake victims.

Among cities witnessing the devastation is Jalalabad, once visited by Sikh Guru Nanak Ji. The city houses Gurdwara Guru Nanak Darbar. There are no exact numbers available for Hindus and Sikhs currently living in Afghanistan.

According to the European Union Agency for Asylum, against a number of over seven lakh in the 70s, approximately 150 were left at the end of 2021.

A post on the website of the organisation of Sikhs and Hindus of Afghanistan says that in 2019, the now-dissolved Independent Election Commission of Afghanistan recorded 1,105 Sikh and Hindu voters across the country. Of them, 759 were in Kabul, 342 in Nangarhar province, and only four in Helmand.

Meanwhile, fearing that hundreds of thousands could be impacted, United Nations officials on the ground said that in the first critical 24 hours after the earthquake hit on Sunday, access was “very limited”.

Relief and rescue work were hampered owing to landslides and rockfalls triggered by the tremors. Some roads were already blocked by previous rockslides caused by recent heavy rainfall.

The region has since experienced several after-shocks. The first earthquake, measuring six on the Richter scale, struck areas close to the Pakistan border on Sunday.

Two days later, another 5.2-magnitude quake struck again.

The Taliban regime, facing sanctions and aid cuts, has appealed to the global community for assistance.

Till now, though as many as 40 countries are in conversation with Kabul, only Russia has granted recognition to the regime.

India has already dispatched humanitarian aid, including 1,000 tents and 15 tons of food supplies. New Delhi has assured Kabul of continuing its assistance in providing medicines and food supplies.

Narratives, noise and News Items the new global order

Geostrategic communication in the latter half of 2025 is undergoing a tectonic shift and an unprecedented push. Events geopolitically have defied the grammar of logic. Information, dissemination, and context generation have broken the ground rules, at times giving rise to infodemics, fakery, and the over-optimization of the content matrix. The reality today is that the global information landscape faces mounting challenges of consistency, focus, norms, and practices. Due to the complexities prevailing, there is no conceptual clarity within communication frameworks to decode issues such as climate change, the green economy, the circular economy, tariffs and trade wars, or sustainable development.

Perceptions of these issues are increasingly dependent on algorithms, data analytics, surveys, and social media tools – mechanisms that filter, amplify, or distort realities. In this absence of clarity and deeper understanding, audiences are being subjected to new ground rules for transparency, authenticity, and content creation, often with uneven results. Economic policies such as tariffs are rarely abstract; they touch ordinary lives through rising costs of essentials, disrupted supply chains, and shifts in employment. Yet, their implications are often communicated in opaque language, numbers, trade flows and deficit balances that alienate rather than inform.

Climate change too suffers from a similar communication gap. A graph of rising CO2 levels may resonate in academic circles, but for the farmer whose crop fails under erratic rains or the urban worker breathing toxic air, the lived consequences demand narratives grounded in daily realities. Disasters, whether climate-driven floods or trade-induced job losses, become communication failures when institutions cannot explain cause, effect, and recourse in ways that ordinary citizens can grasp. For geopolitical communication to have legitimacy, it must move beyond jargon and capture how macro-level shifts intersect with micro-level experience.

Economic issues, strategies, and instantaneous policy mechanisms are now interwoven with the geostrategic landscape, creating complex matrices sharpen divides, and trigger reputational damage before diplomacy has a chance to intervene.

The absence of coherence allows hostile actors

of outreach, perception, and relationships. The challenge before strategists is to design a communication framework that balances competing interests without reducing nuance to noise. Today, tariffs, trade wars, and climate policies resemble boxing matches fought across the information terrain. What is often ignored is the cost of communication missteps, contradictory narratives, conflicting mandates, and escalating rhetoric, which fuel mistrust, to manipulate narratives and exploit uncertainty. In the geostrategic space, reputational management and narrative alignment are no longer afterthoughts but first lines of defence. The imperative is to align stakeholder confidence, ensure channels of de-escalation remain open, and minimize damage by carefully calibrating words before weapons. Appropriate messaging has become the mantra, mobilizing public opinion, signalling

Tariffs and Autonomy

Washington. The United States has slapped unprecedented tariffs on Indian goods, ostensibly to punish New Delhi for sustaining energy and defence ties with Moscow, and unleashed undiplomatic rhetoric that suggests an inclination to treat India as a supplicant. Yet, rather than displaying retreat, India chose to reinforce its comfort with Russia in a highly public setting, and under the watchful gaze of Chinese President Xi Jinping. This triangulation is significant. For China, hosting both Mr Modi and Mr Putin in Tianjin was an opportunity to showcase a platform that can rival Western-led forums. For Russia, embattled by sanctions and ultimatums, it was a stage to demonstrate that it is not isolated, that powerful partners are still willing to sit beside it.

And for India, the moment was about signalling resilience: strategic autonomy is not to be dic-

tated by tariff sticks or diplomatic deadlines. India's posture marks neither defiance nor reckless adventurism. It reflects a careful weighing of national interests in an environment where economic pressure and security imperatives intersect constantly. The economic stakes are considerable. A 50 per cent tariff wall raised by the United States threatens to bite into India's exports, particularly in sectors that had come to rely on the American market.

continuing its advocacy for sector-specific support to

resilience, and projecting a nation's capacity to diversify economically while remaining an active and responsible global player.

As the world steps into this new chapter of geopolitical flux, communication strategies must be sophisticated, dynamic, and multi-dimensional. The political climate is not only testing traditional paradigms but demanding innovation in how messages are crafted, delivered, and consumed. Information today is less about access than credibility, control, and interpretation. The question is not who speaks, but how narratives are framed, reframed, and weaponised. We live in the age of “instant noodle communication,” where messages are expected to be quick, simplified, and emotionally engaging.

In the middle of a crisis, hash-tags trend before policymakers draft official statements, and viral videos eclipse white papers. Public perception forms in real time, demanding that governance and diplomacy weave communication into the very fabric of policy-making. If messaging remains reactive, narratives

The penalty surcharge linked to Russian transactions adds insult to injury, effectively demanding that India choose between affordable oil and access to the US consumer. But a country of India's size and ambition cannot afford to be reduced to such binary choices. The partnership with Russia is not merely sentimental, rooted in Cold War history. It is a matter of hard economics and national security. Energy flows, defence cooperation, and emerging technology exchanges are too critical to abandon at the flick of a tariff wand. Critics may argue that the choreography in Tianjin risks alienating Washington at a delicate time. Yet, the larger truth is that America's own strategy is narrowing India's options. By conflating legitimate trade disputes with geopolitical coercion, Washington is leaving little space for constructive give-and-take.

That vacuum is inevitably filled by alternative arrangements ~ even if they carry their own risks. What emerges from Tianjin, therefore, is not merely the image of three leaders clasping hands, but the outline of a multipolar reality. India will continue to value its partnership with the United States, but not at the expense of its sovereign choices. If tariffs and ultimatums are the language of the day, then gestures of solidarity with Russia and pragmatic cooperation with China will remain indispensable instruments of Indian diplomacy.

Dr. Upasana Arora, Chairman, CII UP and UP Health Summit 2025 and Managing Director, Yashoda Super Specialty Hospitals Private Limited

Recent amendments to GST rates will have a positive impact on the economy, especially in demand and widespread impact in the supply chain system.

Removing GST from health and life insurance premiums will help include more people in the scope of medical safety.

Higher Education Woes

A spate of articles in editorials and opinion pieces regularly bemoans the deplorable state of the higher education system in our country. Common criticisms include a lack of infrastructure, insufficient teaching staff, a skewed PTR (Pupil Teacher ratio), and the perceived hasty rollout of the New Education Policy (NEP). These charges, often led by a section of the teaching community, are typically rooted in long standing legacies. However, the deeper issue lies not just in these surface complaints, but in a reluctance to address fundamental, structural challenges within higher education.

While many criticisms focus on surface-level problems, more critical, foundational issues are undermining the effectiveness of our education system. Sharpening our understanding of the core challenges is essential to meaningful reform. To assess the veracity of the much-touted allegations, it would be fair to begin by looking at some numbers. As per the AISHE (All India Survey on Higher Education) Report 2022-23, the number of universities, both State Public and State private, has increased to 1,168 in 2021-22, up from 903 in 2017-18. While student enrolments have increased, there has also been an increase in the teaching population from 1,284,755 to 1,597,688. Optically, the numbers do not create a fire alarm. The issue is more layered and therefore deserves a further drill-down.

A deep dive into the available information on inadequate infrastructure and teaching resources reveals an interesting paradox. It shows that the groundswell in student enrolment is mainly happening in district colleges where first-time learners are filling up classrooms, creating an infrastructure shortage. Contrastingly, in prestigious institutions like

JNU, Jadavpur University, Presidency University, to name a few, seats in subjects like Economics and Chemistry are going empty. Clearly, infrastructure is not a problem here. The more disquieting issue is that the students of the aforementioned institutions as well as others, disenchanted with the current educational framework, are seeking options which will boost their chances of employability.

While one can argue that education should not be designed on economic considerations alone, this growing apathy merits a rethink. Insofar as the outcry against the low pupil-teacher ratio is concerned, noted economist Karthik Muralidharan tellingly points out that the concern is overblown. “Increasing the number of teachers doesn't help either... evidence suggests a weak relationship between PTR reduction and learning gains. For instance, a study by Abhijit Banerjee and colleagues found no effect of smaller class sizes on student learning”. Meanwhile, the gulf between education and employment continues to widen. Despite the growth in the graduate and post-graduate numbers, the April 2025 PLFS (Periodic Labour Force Survey) figures show urban joblessness standing at 6.5 per cent while rural unemployment numbers are at 4.5 per cent.

What is of greater concern is the fact that the unemployment percentage is 13.8 per cent in the 15-29 years age-group, higher than the overall average. In such a scenario, the outcry regarding building infrastructure and adding more ‘experienced’ teachers rings hollow. Subject-based theoretical teaching, based on narrow grooves, is untenable in a non-linear world. It becomes increasingly clear that the ongoing brouhaha on inadequate funding, PTR ratios, and infrastructure are deflect-

ing the more significant issues affecting higher education which includes outdated curriculum design, ineffective teaching pedagogy, and resistance to change within a section of the teaching community.

These foundational issues demand focussed attention. As part of its new design, the NEP has taken remedial measures to move away from the archaic curriculum, bringing in flexibility and making it more holistic and interdisciplinary. Special emphasis has been given to inculcate ‘a higher order of cognitive capacities’ which encourages critical thinking and problem solving. The redesigned curriculum attempts to bridge the gap between education and employability, focusing on developing student capabilities which would be relevant to evolving employment needs. To complement the redesigned curriculum, the NEP boldly breaks away from the outdated Macaulayan pedagogic structure. Introducing a more student-centric, multidisciplinary, technology-enabled framework it encourages a blended model of pedagogy. This includes digital literacy, interdisciplinarity, problem solving and vocational exposure. The ITEP (Integrated Teacher Education Programme) is being implemented along with others. Unfortunately, the result of these efforts has been middling to poor. The foremost reason for this resistance is the resolute indifference of a large section of the teaching community in accepting and adapting to the change.

Ignoring the fact that education has to be viewed from a historical and relational context, they continue to deploy dated pedagogy, paying lip-service to the idea for a student-centric framework. The existing teaching community's ingrained resistance to accept a syncretic approach is both behavioural and capability-driven. a moment when global alignments are being redrawn under duress. The optics were striking. A visibly relaxed exchange between the Indian and Russian leaders, one punctuated by warmth and informality, was far removed from the coercive language emanating from

ADDITIONAL STOPPAGE PROVIDED TO SEVEN TRAINS AT VARIOUS STATIONS

Mumbai, For the convenience of passengers, Western Railway has decided to provide additional stoppages to seven trains at various stations.

According to a press release issued by Chief Public Relations Officer of Western Railway, Shri Vineet Abhishek, the details are as under:

1. Train No. 12216 Bandra Terminus – Delhi Sarai Rohilla SuperFast Garib Rath Express will halt at Mahesana station w.e.f journey commencing from Bandra Terminus on 03rd September, 2025. The train will arrive Mahesana station at 20:42 hrs and depart at 20:44 hrs. Similarly, Train No. 12215 Delhi Sarai Rohilla – Bandra Terminus SuperFast Garib Rath Express will halt at Mahesana station w.e.f journey commencing from Delhi Sarai Rohilla on 04th September, 2025. The train

will arrive Mahesana station at 22:05 hrs and depart at 22:07 hrs.

2. Train No. 22915 Bandra Terminus – Hisar SuperFast Express (Weekly) will halt at Siddhpur station w.e.f journey commencing from Bandra Terminus on 08th September, 2025. The train will arrive Siddhpur station at 21:23 hrs and depart at 21:25 hrs.

3. Train No. 20935 Gandhidham – Indore SuperFast Express (Weekly) will halt at Samakhiali station w.e.f journey commencing from Gandhidham on 08th September, 2025. The train will arrive Samakhiali station at 19:10 hrs and depart at 19:12 hrs. Similarly, Train No. 20936 Indore – Gandhidham SuperFast Express (Weekly) will halt at Samakhiali station w.e.f journey commencing from Indore on 07th September, 2025. The train will arrive

Samakhiali station at 12:40 hrs and depart at 12:42 hrs.

4. Train No. 14802 Indore – Jodhpur Express will halt at Gautampura Road station w.e.f journey commencing from Indore on 06th September, 2025. The train will arrive Gautampura Road station at 05:17 hrs and depart at 05:19 hrs. Similarly, Train No. 14801 Jodhpur – Indore Express will halt at Gautampura Road station w.e.f journey commencing from Jodhpur on 05th September, 2025. The train will arrive Gautampura Road station at 21:50 hrs and depart at 21:52 hrs.

5. Train No. 16534 Bengaluru – Bhagat Ki Kothi Express (Weekly) will halt at Mahesana station w.e.f journey commencing from Bengaluru on 07th September, 2025. The train will arrive Mahesana station at 06:50 hrs and depart at 06:52 hrs. Similarly, Train No. 16533 Bhagat Ki Kothi –

Bengaluru Express (Weekly) will halt at Mahesana station w.e.f journey commencing from Bhagat Ki Kothi on 10th September, 2025. The train will arrive Mahesana station at 12:22 hrs and depart at 12:24 hrs.

6. Train No. 16312 Thiruvananthapuram – Sri Ganganagar Express (Weekly) will halt at Mahesana station w.e.f journey commencing from Thiruvananthapuram on 06th September, 2025. The train will arrive Mahesana station at 08:38 hrs and depart at 08:40 hrs. Similarly, Train No. 16311 Sri Ganganagar – Thiruvananthapuram Express (Weekly) will halt at Mahesana station w.e.f journey commencing from Sri Ganganagar on 09th September, 2025. The train will arrive Mahesana station at 05:45 hrs and depart at 05:47 hrs.

7. Train No. 14311 Bareilly – Bhuj Ala Hazrat Express (Tri-weekly) will halt at Maliya Miyana station w.e.f journey commencing from Bareilly on 04th September, 2025. The train will arrive Maliya Miyana station at 06:43 hrs and depart at 06:45 hrs.

WR's JUMBO BLOCK BETWEEN SANTACRUZ AND GOREGAON STATIONS ON SUNDAY, 07th SEPTEMBER, 2025

Mumbai, To carry out maintenance work of tracks, signaling and overhead equipment, a Jumbo Block of five hours will be taken on UP & DOWN Fast lines between Santacruz and Goregaon stations from 10.00 hrs to 15.00 hrs on Sunday, 07th

September, 2025.

According to a press release issued by Chief Public Relations Officer of Western Railway, Shri Vineet Abhishek, during the block period, all Fast line suburban trains will be operated on Slow line between Goregaon and

Santacruz stations.

Some suburban trains will remain cancelled during the block and also some of the Andheri & Borivali trains will be worked up to Goregaon on harbour line.

Detailed information to this effect is available with concerned Station Masters.

Nepal Blocks 26 Social Media Platforms Including Facebook, Instagram, YouTube Over Registration Rules

(Gns).

Nepal's government has announced a sweeping ban on 26 social media platforms, including Facebook, Instagram, YouTube, and X (formerly Twitter), after the companies failed to comply with mandatory registration rules. At present, only five platforms-including TikTok and Viber-are permitted to operate in the country, as they have met the government's requirements.

Communication and Information Minister Prithvi Subba Gurung said that despite repeated notifications, the two dozen platforms did not register their operations within Nepal. As a result, they will be blocked immediately. In contrast, platforms that have complied with the law can continue functioning.

Nepal's government has banned 26 social media platforms, including Facebook and X, for failing to comply with registration rules, while platforms like

TikTok and Viber are permitted to operate, following a Supreme Court ruling that

expired on Wednesday night, prompting the enforcement of the ban.

mandates registration for all online platforms.

Why Was the Ban Imposed?

The move comes after the government's final warning on August 28, which gave companies a seven-day deadline to register locally. The deadline

Authorities had been urging social media giants to appoint a local contact or liaison person. To support this, the government has also introduced a bill in parliament aimed at improving the management, responsibility, and accountability of online platforms.

Union Agriculture Minister Shri Shivraj Singh Chouhan visits flood-affected areas of Punjab

(Gns).

Union Minister of Agriculture & Farmers' Welfare and Rural Development, Shri Shivraj Singh Chouhan today visited the flood-affected areas of Punjab. The Union Minister went to Ghonewal village in Amritsar district, Begowal in Kapurthala district, Dharamkot Randhawa village and Behrampur village in Gurdaspur district, interacted with the farmers and inspected the crop losses by stepping into water-filled fields. During the visit, the farmers informed the Union Minister about heavy loss to crops and shared their grievances.

Governor of Punjab Shri Gulab Chand Kataria, also paid a courtesy visit to the Union Minister at Amritsar airport and handed over a detailed report on the floods.

While visiting flood-affected areas, Union Agriculture Minister Shri Shivraj Singh Chouhan

said that the situation is very grim and the crisis is dreadful. Due to the deluge, the crops are submerged and completely destroyed

the situation. But we will definitely bring our farmer brothers and sisters out of this problem. This is challenging, but every possible

and ruined, and 1,400 villages are completely affected. "Floodwater has inundated the fields here since August 26. The water of Ravi is still flowing into the fields. There is no soil under the feet, only silt, which has accumulated. This crops have been completely destroyed, and there is also a crisis on the next crop. The pain and loss cannot be estimated. It's heartbreaking to see

effort will be made and complete help will be provided to deliver relief," the Minister said.

The Union Agriculture Minister informed that, on the instructions of Prime Minister Shri Narendra Modi, the Central Government has sent two high-level teams to Punjab to assess the situation, which include officers from the Ministries of Agriculture, Rural Development, Roads,

Energy, Finance, and Jal Shakti. He also said that these teams will visit the affected areas, assess the situation, and submit their report to the Government of India. The Union Minister said the affected people will be consulted to understand the ground situation, and a detailed report will be submitted to Prime Minister Shri Narendra Modi. The state government will also conduct its own assessment.

The Union Agriculture Minister said that the whole country is proud of Punjab as the state has always stood as a shield of the nation in times of crisis. "I only want to say that I have come here on the instructions of the Prime Minister, and in this hour of crisis, the government is firmly standing with Punjab, with our farmer brothers and sisters of Punjab, with the people of Punjab. The government will definitely bring the farmers out of this disaster," Shri Chouhan said.

FIEO Signs MoU with BRISKPE to Promote Awareness on Faster and Compliant Cross-Border Payments

New Delhi, 03 September 2025 – The Federation of Indian Export Organisations (FIEO), the apex trade promotion body representing Indian exporters, has signed a Memorandum of Understanding (MoU) with BRISKPE, a fintech company enabling secure and efficient cross-border payments.

The collaboration is designed to create awareness among exporters, particularly Micro, Small, and Medium Enterprises (MSMEs), about the growing importance of digital payment solutions in international trade. With exports expanding rapidly, Indian businesses are increasingly seeking transparent, compliant, and time-efficient systems to receive payments from global buyers.

The MoU was signed at Niryat Bhawan, New Delhi, by Dr Ajay Sahai, Director General & CEO, FIEO, on signing the MoU said: "Ensuring smooth and timely payment flows is a vital part of the export ecosys-

Navale, Nodal officer from FIEO and other dignitaries. The collaboration reflects a joint effort to raise awareness about digital tools that can support exporters, including timely access to documentation such as e-FIRA and e-BRC, thereby strengthening their ability to compete globally.

As part of the MoU, BRISKPE will engage with FIEO members through knowledge sessions and outreach initiatives, sharing insights on technology-driven and compliant cross-border payment solutions. Exporters will also be introduced to simplified international collections across B2B, C2B, and B2C models, which may help them manage cash flow more efficiently.

Dr Ajay Sahai, Director General & CEO, FIEO, on signing the MoU said: "Ensuring smooth and timely payment flows is a vital part of the export ecosys-

tem. Our association with BRISKPE provides a platform to highlight digital solutions that may support exporters in realizing payments faster and with greater transparency, thereby helping them remain competitive in global trade."

Mr Indunath Chaudhary, Co-Founder & COO, BRISKPE, remarked: "This MoU with FIEO is a significant step for BRISKPE. Exporters across India, particularly MSMEs, face unique challenges when it comes to international pay-

ments. Through this collaboration, we aim to share knowledge on next-generation digital solutions that can simplify their cross-border transactions and enable them to manage cash flows more effectively."

About FIEO

The Federation of Indian Export Organisations (FIEO), established in 1965, is the apex trade promotion body jointly set up by the Ministry of Commerce, Government of India, and private trade and industry. It represents Indian exporters across sectors, serving as a key interface with policymakers and supporting the growth of India's global trade footprint.

About BRISKPE

BRISKPE is a fintech company providing cross-border payment aggregation solutions for businesses engaged in international trade. With a focus on compliance, transparency, and efficiency, BRISKPE's digital platform supports exporters and importers in managing secure global transactions.

Ukraine Conflict Pretext To Take Various Steps Against Countries Having Economic Ties With Russia: Putin

(Gns).

Russian President Vladimir Putin on Wednesday said that the Ukraine conflict is used as a "pretext" by Western nations to impose broader sanctions against Moscow.

During a media briefing after his four-day trip to China, he stated that these measures are more about targeting countries with strong economic ties to Russia than addressing the actual situation in Ukraine.

Russian President Vladimir Putin stated that Western nations use the Ukraine conflict as a pretext for sanctions against

countries with strong economic ties to Russia, citing examples like Brazil and highlighting economic imbalances and US tariff policies affecting global trade, including India.

Putin highlighted the imposition of additional tariffs on Brazil earlier in August as an example of sanctions unrelated to the Ukraine conflict. He noted that these actions are often justified under false pretenses, serving political or economic agendas rather than genuine

concerns over Ukraine.

The Russian leader pointed out that many sanctions stem from growing economic imbalances between Western countries, especially the United States, and major economies like India, China, and Brazil. He mentioned that while there is a trade imbalance

between the US and India or China, Brazil faced tariffs without any direct link to Ukraine.

"There is a trade disproportion between the United

States and India or with China," Putin stated. "But there is no situation between Brazil and the United States, for example." He emphasized that such issues should be resolved through negotiations rather than punitive measures.

Impact on Global Trade

The global economic landscape has been affected by tariff policies introduced by US President Donald Trump. These policies have led to tensions with several countries, notably due to tariffs imposed on India and China.

Two-Day Departmental Summit on National Ayush Mission and Capacity Building Concludes in New Delhi

(Gns).

The two-day Departmental Summit on "National Ayush Mission and Capacity Building in States", organized by the Ministry of Ayush, concluded today at the All India Institute of Ayurveda (AIIA), Sarita Vihar, New Delhi. The summit brought together senior policymakers, State and UT health officials, domain experts, and stakeholders from across the country to deliberate on strengthening the Ayush sector at the national and sub-national levels.

The summit was inaugurated on September 3 by the Hon'ble Union Minister of State (Independent Charge), Ministry of Ayush, Shri Prataprao Jadhav, in the esteemed presence of Dr. V. K. Paul, Member (Health), NITI Aayog, and

Vaidya Rajesh Kotecha, Secretary, Ministry of Ayush.

In his inaugural address, Shri Jadhav highlighted the

public with insurance claims, and an Advanced Centre for Ayurveda Digital Learning and Communications, aimed at

transformative impact of the National Ayush Mission (NAM) in expanding affordable and inclusive Ayush healthcare services under the visionary leadership of the Hon'ble Prime Minister. He also inaugurated two key facilities at AIIA: a Project Management Unit (PMU) for assisting the

enhancing capacity building, professional development, and digital innovation in the sector.

Dr. V. K. Paul emphasized the importance of synergy between the National Health Mission (NHM) and the National Ayush Mission (NAM) to improve national health

outcomes and stressed the importance of collaborative action between the Centre and States.

The summit witnessed wide participation and intense discussions across six thematic areas, including:

- Financial Management and Project Monitoring
- Integration of Ayush with Modern Healthcare and Public Health Programs
- Human Resource Strengthening and Capacity Building
- Infrastructure Development and Service Delivery
- Quality Assurance of ASU&H Medicines including Branding and Packaging
- IT-enabled Digital Services for the Ayush Sector

India Develops Rare Reference Material for Enhanced Anti-Doping Testing in Sports

(Gns).

In a significant step towards strengthening anti-doping efforts in sports, the National Institute of Pharmaceutical Education and Research (NIPER) Guwahati, under the Department of Pharmaceuticals, in collaboration with the National Dope Testing Laboratory (NDTL), New Delhi, has successfully developed a rare and high-purity Reference Material (RM) – Methandienone Long-Term Metabolite (LTM).

The Reference Material was formally launched today by Dr. Mansukh Mandaviya, Hon'ble Union Minister for Youth Affairs & Sports and Minister of Labour & Employment, during the 22nd Governing

Body Meeting of NDTL, in New Delhi. The event was graced by senior officials from the Ministry of Youth

Affairs and Sports, Department of Pharmaceuticals, and representatives from NIPER Guwahati and NDTL.

Reference Materials (RMs) are the most highly purified and scientifically characterized forms of drug substances or their

metabolites, essential for accurate analytical testing. In the context of anti-doping, they are crucial for the

detection of over 450 substances that are currently prohibited by the World Anti-Doping Agency (WADA). Due to their specialized application in dope testing, these RMs are produced by only a few manufacturers globally (approximately 4-5), making them

scarce and often expensive. The National Dope Testing Laboratory (NDTL) and NIPER-Guwahati are collaborating to produce 22 such Reference Materials, which are not commercially available worldwide for Anti-Doping analysis. Since 2020, 12 RM out of 22 has been synthesized by NIPER Guwahati and delivered to NDTL with Methandienone LTM being the latest one.

As of now, Methandienone LTM is not commercially available globally. At present scenario, the best targets to track doping misuse in sports are those eliminated in urine over extended times. These are usually referred to as long-term metabolites (LTMs).

ASM Inauguration of new session for first year students in Polytechnic, Mathura

Mathura. In Dr. CV Raman Auditorium of BSA College of Engineering and Technology, Mathura, an original program was organized for the first year new students of Polytechnic. Inauguration of the program Advocate Umashankar Aggarwal, AS .M Director Professor Dr. Lokendra Kumar Sharma, BSA CET Director Professor Dr. Shyam Sundar Aggarwal, Pharmacy Director Dr. Rakesh Kumar, Registrar Bhagwan Singh, all departments and teachers jointly offered the island lit and offered to the idol of Mau Saraswati. Jaipuria Institute of Management Rises in NIRF 2025 Rankings:

Four Campuses Among India's Top Management Institutes
Lucknow ,04th September 2025: In the NIRF 2025 Management Rankings, Jaipuria Institute of Management has once again strengthened its national standing with all four campuses ranked among India's top management Institutes. Jaipuria Noida climbed to rank 41 (from 45 last year), Lucknow to 67 (from 72), Jaipur to 74 (from 75), while Indore maintained its standing in the 101–125 rank band. This consistent upward trajectory reflects Jaipuria's unwavering focus on academic excellence, research innovation, and student success. The rise of Noida, Lucknow and Jaipur campuses in particular highlights Jaipuria's ability to continuously improve and adapt in an

evolving education landscape. The National Institutional Ranking Framework (NIRF), launched in 2015 by the Ministry of Education, is now regarded as the gold standard for evaluating higher education institutions in India. Built to bring transparency, accountability, and healthy competition, the rankings are based on five parameters: Teaching, Learning & Resources; Research & Professional Practices; Graduation Outcomes; Outreach & Inclusivity; and Perception. Over the past decade, the framework has become a trusted guide for students, families, and academic stakeholders in making informed choices. With an unwavering commitment to excellence, Jaipuria Institute of Management has firmly established itself as a

management institution with a philosophy that is Student First, AI Native, and Career Ready. Backed by a legacy of 30 years and campuses in Lucknow, Noida, Jaipur, and Indore, Jaipuria delivers personalized learning journeys, technology-driven pedagogy, and a robust placement record—with 275+ recruiters, 1,100+ offers, and international packages as high as ₹36.64 LPA—making it a preferred choice for management aspirants nationwide. Commenting on the achievement, Shreevats Jaipuria, Vice Chairman, Jaipuria Institute of Management, said: "The rise of our campuses in the NIRF 2025 rankings is a matter of immense pride and a reflection of Jaipuria's focus on academic quality, impactful research, and student outcomes. This recognition

belongs to our faculty, students, alumni, and staff who together drive our pursuit of excellence. As we move forward, we remain committed to preparing future-ready leaders who can thrive in a rapidly changing business world." Looking ahead, Jaipuria aims to build on this success by deepening its research footprint, strengthening global collaborations, and expanding the role of technology in management education. With a legacy of three decades and a reputation reinforced by national rankings and globally recognized AACSB accreditation. The institute is poised to equip the next generation of leaders with the vision, adaptability, and resilience required to shape businesses and society in the years to come.

Sunshine by LISSUN Marks 600+ Child's Mental Health Interventions in Lucknow

- LISSUN Saw Highest Engagement Through Speech and Occupational Therapy in Lucknow
- Joined Hands With 5 Schools and Pediatric Experts Across the City

Lucknow, 04 September 2025: LISSUN, one of India's leading mental health platforms, today announced that Sunshine by LISSUN—its specialized division for child development and therapy services—has positively impacted the lives of over 600 children and adolescents in Lucknow. Sunshine centers in the city have been at the forefront of addressing common mental health and behavioral concerns including speech delays, hyperactivity, attention-concentration difficulties, sensory integration challenges, motor skill delays, learning disabilities, and autism spectrum disorders.

Among its wide range of offerings, speech therapy and occupational therapy have witnessed the highest traction, enabling children to overcome speech articulation challenges, manage hyperactivity, and strengthen focus and sensory skills.

This success has been built on deep collaborations with leading schools such as Shri Ram Global School, Kidzee Preschool, FirstCryIntellitots, EuroKids, and GD Goenka Toddlers, alongside partnerships with doctors and pediatric specialists across the city. Currently operating 2 centers in Lucknow with a dedicated team of 15 trained therapists and professionals, Sunshine by LISSUN is on track to scale up to 4 centers in the city by 2025–26. Speaking at a press event at Sunshine's Gomti Nagar center, Tarun Gupta, Co-Founder of LIS-SUN, said, "At LISSUN, we believe every child deserves the right environment and guidance to thrive. The progress we've witnessed in Lucknow reinforces our vision of creating a child-first mental health ecosystem that is accessible, affordable, and deeply impactful. Parents often come to us with uncertainty and concern, and it is heartening to see their children gradually finding their voice,

improving focus, or learning to interact more confidently with the world around them. Each milestone, no matter how small, is a collective victory for families, therapists, and educators working together. Our goal is to ensure that no child is left behind due to lack of awareness or access to quality care." Adding to this, Shreya Malik, Regional Head for Uttar Pradesh at LISSUN, said, "Our partnerships with schools, pediatricians, and local communities are crucial to building a sustainable framework for early intervention. The overwhelming response in Lucknow gives us confidence to replicate this model in other cities of Uttar Pradesh, ensuring more children get timely support. In a city like Lucknow, we get various clients residing in the adjoining areas as well, like Barabanki, Sitapur, Gorakhpur, etc., as the infrastructure for mental health is yet developing. When parents come back and mention that they pray centres and facilities like

these get available in their city, as they see their children grow and learn each day. Feedbacks like this give us the confidence that even in tier 2 cities where mental health awareness is beginning to develop, we can provide the quality care." The expansion roadmap goes beyond Lucknow, targeting neighboring cities in Uttar Pradesh with high demand for pediatric and adolescent mental health support. This will be achieved through collaborations with schools and preschools for early screening, partnerships with colleges and coaching institutions for student wellness, integration with pediatric healthcare networks, and community-based outreach initiatives including workshops and wellness camps. Nationally, Sunshine by LISSUN currently operates 20 centers across key cities and is poised to scale to 40 by the end of 2025. With a bold long-term plan, the division aims to expand to over 200 centers in the next two to four years. Complementing this expansion, LISSUN recently acquired US-based Being Cares, Inc.,

Lifestyle improvement : The basis of healthy living

Lucknow. FICCI FLO Lucknow Chapter today organized a health awareness program "Empowering Women, Improving Health - The Power of Empowerment" at Medanta Hospital, Lucknow. The session focused on "Connecting Heart, Nerves and Bones - The Core of Women's Health" and featured experts from Dr. Ram Kirti Saran (Cardiology), Dr. Anup Kumar Thacker (Neurology), and Dr. Saif

Nabi Shah (Orthopedics). The discussion highlighted important aspects of women's health, emphasizing the importance of preventive care, lifestyle awareness and early diagnosis. FICCI FLO Lucknow Chapter Chairperson Vandita Agarwal said that this program reflects FLO Lucknow's commitment towards women empower-

ment as health is the first step towards true empowerment. She said that today's program concludes that Lifestyle improvement is the basis of healthy living. The panel discussion was moderated by Dr. Arpita Anand and the event

was moderated by Shilpa Gupta. The attendees also received free bone mineral density (BMD) tests and FLO members were provided with an exclusive Medanta discount card. Over 70 FLO members including Simran Sahni, Devanshi Seth, Jyotsna Habibullah attended the event.

District Magistrate inspected the shelter home/flood refugee site of Tehsil chhataa, distributed food with hands

In view of the rising water level of Yamunaji, the martyr Chandrashekhar Azad of Tehsil Mont inspected the water of Yamuna ji who came on the road near Yamunapol police station, Yamunapol police station, Yamunapol police station Mathura. District Magistrate Chandra Prakash Singh inspected the flood shelter home/ flood refugee site installed in village Bahta of Tehsil chhataa all day on Thursday. During the inspection of the District Magistrate, flood affected people were found eating food in the relief camp, on which the District Magistrate asked him about the quality of food. People said that food is good and breakfast, food etc. are available in time. Deputy District Magistrate chhataa Vaibhav Gupta

informed that 43 people are living in the said flood relief camp. The District Magistrate inspired every-

kits to the flood -affected families present in the flood relief camp and they all go to their efficiency. He heard

Giving food from their own hands to flood victims

one to maintain patience / restraint and said that in two or three days, all things will become normal. In two -three days, the water level of Yamuna ji will start decreasing. The District Magistrate distributed ration material

the problems of all and assured that the problems of all would be resolved. He said that a survey of flood affected houses and crops will be done and all will be compensated. The administration is fully committed to the said work. All efforts

guests of the country abroad. You never have to give up. In a passionate manner, the poem of poet Sohanlal Dwivedi, those who tried never lost, filled

the students excited. He said that the importance is not about where you have come from, the importance is that where you go. He said that students come

COLORS' stars share heartfelt lessons from the mentors who shaped their careers

Gurmeet Choudhary as seen on COLORS' 'Pati Patni Aur Panga – Jodiyaon Ka Reality Check' says, "My daughters, Lianna and Divisha, teach me life's biggest lessons through their smallest gestures. Every innocent smile, curious question, and even their adorable tantrums have taught me invaluable lessons about love, patience, and finding wonder in everyday moments. Debinna, my life partner and greatest mentor, has shown me what it means to love unconditionally and stand strong through life's storms. She's taught me the art of giving without expecting anything in return and finding strength in vulnerability. Even during our journey on 'Pati Patni Aur Panga – Jodiyaon Ka Reality Check,' we continue discovering new facets of each other, proving that learning and growth never truly end. This Teacher's Day, I realize that my home

has become my most important classroom, and my family members are the teachers who continuously shape my heart and soul." Deepika Singh essay-

ing the role of Mangal in COLORS' 'Mangal Lakshmi' says, "Teacher's Day reminds me that learning often comes from the most unexpected places. But to me, the journey of learning feels incomplete without thanking our parents, who are our very first teachers. They instill values, discipline, and a lens through which we see the world. I owe a great deal to my school teachers and to my joint family for shaping the

person I am today. From my father, I inherited a 'never quit' spirit, and from my husband Rohit, I learned the art of feeling every dialogue. These lessons have helped me bring truth and vulnerability to my character in Mangal Lakshmi. My greatest teachers have always been my parents and family. Today, even my son Soham teaches me patience and willpower. In fact, everyone around me, through their words, actions, or simply their presence, adds something to my learning, and for that, I remain grateful."

Divyam Shukla, portraying the role of Samrat in COLORS' 'Dhaakad Beera' says "I learn something totally new every day on the set of Dhaakad Beera, and it's amazing! Rakshanda ma'am is the best teacher and mentor I could ask for – she's

are being made by the government to help the flood affected families, no one will be allowed to face any problem.

The District Magistrate reviewed the treatment being given by the medical team in Bahta. He instructed the medical team to discharge their works responsibly. The District Magistrate also checked the medicines being used by the medical team and saw the expiry.

After the inspection of village Bahta, District Magistrate Chandra Prakash Singh visited the water level of Yamuna Ji, who came on the road near the martyr Chandrashekhar Azad Police Outpost Yamuna Bridge police station Nauhghheel, in view of the rising water level of Yamuna ji.

tive committee approved by the National President has also been constituted in which Rakesh Shukla, Vivek Verma as Vice President, Kamal Kumar Srivastava as General Secretary, Dilip Kumar Pandey as Treasurer, Deepak Awasthi as Minister, Atul Kumar Singh, Gaurav Chhabra as Joint Minister, Sanjay Sonkar as Organization Minister, Girish Tiwari as Legal Advisor and Ashish Kumar Sharma, Ankit Mishra, Manish Agnihotri, Pawan Kumar Dixit, Sant Kumar Mishra have been appointed as executive members.

from all places in the university, but the name is those who rise above their talent. He told the students that they have come to the sanskriti university before, coming here and there is a different feeling which creates positivity in the mind. Social activists, Youth for Nation Organization President Birandam Gunakar, while giving detailed information on the importance of environment and its significance, said that today the land, atmosphere and water have all been polluted. The whole world is accepting that we have some mistakes. Gunakar said that the environment has been given importance in our country since ancient times, but due to extreme pesticides
