Pm Modi will inaugurate the Vibrant Gujarat Regional Conference in Rajkot on 11 January: Deputy Chief Minister Shri Harsh Sanghavi

Deputy Chief Minister addresses journalists at the Collector Office in Rajkot
VGRC will bring large-scale investment to Saurashtra-Kutch region: Shri Harsh Sanghavi

Gujarat Government's Proactive Approach to Resolving Entrepreneurs' Issues Through Direct Meetings: In-charge Minister Shri Jitubhai Vaghani*

Rajkot, 5 January 2026: Deputy Chief Minister Shri Harsh Sanghavi stated at a press conference at the Rajkot District Collector Office that, following the guidance of Chief Minister Shri Bhupendra Patel, a coordination meeting with industrialists from

Saurashtra-Kutch region was held today in Rajkot to promptly resolve the issues and representations of small and large industrialists, enabling further investment and industrial growth. Group meetings with all departments were also conducted.

He stated that Rajkot is Gujarat's growth engine in the manufacturing sector, and to attract more investment from India and abroad, the Vibrant Gujarat Regional Conference (VGRC) has been organised in Rajkot under the guidance of Chief Minister. He added that the first edition of VGRC was earlier held

successfully in Mehsana. He said that Prime Minister Shri Narendra Modi will

at Marwadi University in Rajkot, and expressed confidence that the confer-

He said that Rajkot is making rapid progress across manufacturing and other sectors, and to further accelerate development and make it easier for traders, industrialists, and manufacturers to work, the meeting was organised today. He stated that under various Gujarat Government industrial policies, incentive assistance worth Rs. 956.51 crore was distributed today from Rajkot to 10,435 industrialists. Approval letters worth over Rs. 661 crore under schemes

including the Textile Incentive to Industries, Environmental Industrial Infrastructure Facilities Scheme, and small industry schemes will be distributed to 137 industrialists from Saurashtra-Kutch. He added that Gujarat is the fastest state in providing incentives, with the Industries Department working round the clock to speed up the process. Under the leadership of Prime Minister, Gujarat has attracted the highest investment in the country. He expressed confidence

that, under Chief Minister's leadership and with public cooperation, the state will continue to draw maximum investment and move steadily on the path of development.

In-charge Minister Shri Jitubhai Vaghani stated that industrialists and traders play a vital role in strengthening the state's economy through diverse products and business activities. He appreciated today's meeting with industrialists, held under the leadership of Chief Minister and Deputy Chief

Minister, aimed at resolving industrialists' issues on the spot and promptly addressing policy-related matters at the state level.

The event was attended by Additional Chief Secretary of the Revenue Department Dr. Jayanti Ravi, Principal Secretary of the Industries and Mines Department Ms. Mamta Verma, MLAs Shri Uday Kangad, Dr. Darshita Shah, Shri Durlabhji Dethariya, District Collector Dr. Om Prakash, other leaders and other senior officials.

UP CM Yogi Adityanath Gifts Ram Mandir Model to Prime Minister Modi During Delhi Visit

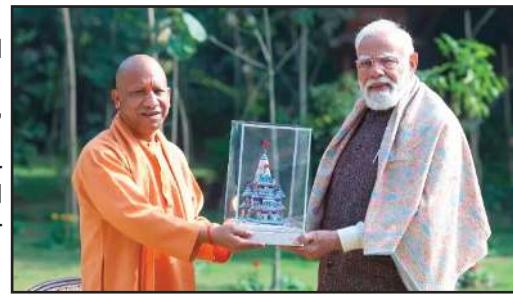

(Gns).

The Uttar Pradesh Chief Minister Yogi Adityanath met Prime Minister Narendra Modi in New Delhi on Monday for detailed talks. Both leaders focused on Uttar Pradesh's development roadmap, governance standards and the long-term vision for growth across the state.

Officials later said the conversation between Narendra Modi and Yogi Adityanath lasted for about an hour. During this interaction, they reviewed ongoing projects, discussed future strategies, and examined how to quicken implementation of key programmes across Uttar Pradesh.

Uttar Pradesh Chief Minister Yogi Adityanath

met Prime Minister Narendra Modi in New Delhi to discuss Uttar Pradesh's development roadmap, infrastructure expansion, welfare schemes, and administrative improvements, reviewing ongoing projects and future strategies.

Adityanath presented Modi with a Ram Mandir replica created by Kunj Bihari ji during their meeting.

After leaving the meeting venue, Yogi Adityanath shared an update on X about the interaction with Narendra Modi. Yogi Adityanath wrote that the Prime Minister's vision continues to guide the state's progress

BJP's fundamental character is anti-democratic: Akhilesh Yadav

(Gns).

Samajwadi Party National President Akhilesh Yadav on Monday said that the fundamental character of the Bharatiya Janata Party (BJP) is anti-democratic.

Alleging misuse of power, Yadav said, "The BJP is misusing its authority through the ongoing Socio-Economic Survey (SES). The NRC process is conducted by the Ministry of Home Affairs, but the government is using the Election Commission to carry out NRC-related work through the SES."

On Monday, hundreds of workers, leaders, youth, intellectuals, doctors, pro-

fessors, and religious figures from various districts met Akhilesh Yadav at the Samajwadi Party state

the Constitution or democracy. He alleged that the party makes false promises to the people and keeps the public in constant distress.

"Since the BJP government came to power, people have been made to stand in queues," he said.

He further stated that the Samajwadi Party follows the path shown by the Constitution and is always ready to protect democracy. Describing the 2027 Assembly election as crucial, Yadav said the BJP government has

ruined Uttar Pradesh. "To stop the destruction and ensure the development of the state, a Samajwadi Party government must be formed," he added.

Yadav also accused the BJP government of betraying farmers, youth, women, and traders. He said that inflation, unemployment, corruption, injustice, and atrocities are at their peak under the BJP rule.

"The public is fed up with the misgovernance of the BJP government and is troubled by its dishonesty and plunder. The people will defeat the BJP in 2027 and put an end to its misrule," he asserted.

headquarters in Lucknow to extend New Year greetings and pledged to form a Samajwadi Party government in the state in 2027.

Yadav said that the BJP represents negative ideologies and does not respect

Party workers must work hard to retain power in 2027: UP BJP President

(Gns).

Uttar Pradesh BJP President and Union Minister of State for Finance Pankaj Chaudhary on Monday said that to realise the goal of a developed India by 2047, all party workers must move forward with the resolve to retain the BJP government in the state in the 2027 Assembly elections.

On his arrival in Gorakhpur, the newly elected BJP state president was accorded a grand welcome by party office-bearers and a large number of workers. Overwhelmed by the reception, Chaudhary said party workers were paramount to him.

Addressing a welcome and felicitation ceremony and a meeting of the Gorakhpur region, Chaudhary said he had no words to express his grati-

tude for the love, affection and warm welcome extended by the workers. He said he felt proud and emotional to be among them.

Recalling his political journey, the BJP state president said the party had made him a councillor in 1989 and Deputy Mayor in 1990, and had fielded him as a Lok Sabha candidate nine times.

He added that the party had entrusted him with the responsibility of serving as Union Minister of State for Finance for a second term and has now given him the significant responsibility of leading the BJP in Uttar Pradesh.

Chaudhary said party

workers are the strength of the BJP and the organisation is its identity. "It is our responsibility to further

is essential to fulfil the vision of a developed India, and this is possible only under a BJP government," he said.

The state BJP president said Gorakhpur holds immense religious and political significance. "From this land, Yogi Adityanath has served as Chief Minister for two terms. He has transformed a backward state into a developed one, giving Uttar Pradesh a new identity in the country. Gorakhpur is also home to important religious institutions such as the Guru Gorakhnath Temple and Gita Press," he said.

Chaudhary added that there was a time when India's voice was ignored globally, but today, under Prime Minister Modi's leadership, the world listens to India seriously.

strengthen the organisation at the booth level," he said.

"To realise Prime Minister Narendra Modi's vision of a developed India, we must ensure a bigger victory for the BJP in the 2027 Assembly elections than in 2017. A strong and prosperous Uttar Pradesh

5.1-Magnitude Earthquake Hits Assam, Tremors Felt Across Northeast India

(Gns).

A 5.1-magnitude earthquake struck Assam and parts of Northeast India in the early hours of January 5, 2026, triggering panic among residents who rushed out of their homes after being awakened by strong tremors.

According to the National Center for Seismology (NCS), the earthquake occurred at 4:17 am, with its epicenter located near Morigaon district in central Assam. The tremor originated at a depth of 50 kilometres, which

experts say generally reduces surface-level damage while allowing seismic waves to be felt across a wider region.

On January 5, 2026, a 5.1-magnitude earthquake struck Assam and Northeast India at 4:17 am, with its epicenter near Morigaon.

The National Center for Seismology reported no immediate reported sharp shaking casualties, and authorities

continue monitoring for aftershocks near the Kopili fault system.

People in Morigaon and neighbouring districts

hours. Many residents left their homes in alarm and waited outside until the tremors subsided. The earthquake was felt across several parts of central Assam, though authorities said the situation remained under control.

Emergency services and district administrations confirmed that no casualties or property damage had been reported immediately after the quake. Officials continued to monitor developments as a precaution, given the region's seismic sensitivity.

Amit Shah kicks off Pongal celebrations with 'Modi Pongal' in TN

(Gns).

In an effort at making Prime Minister Narendra Modi closer to Tamil culture and shedding the saffron party's northern tag, Union Home Minister Amit Shah kicked off the Pongal celebrations with his participation at the 'Modi Pongal' organised by the BJP Women's Wing.

Attired in the traditional Tamil dress code of white dhoti and shirt with an

angavastram (long towel), Shah took part in the 'Modi Pongal' in which women cooked Pongal (rice with jaggery, milk and ghee) in 1008 clay pots. According to the BJP Women's Wing, the organisers of the event held at Mannarpuram in the city had drawn more than 2000 women.

Pongal, the single most important festival celebrated for five days in

Tamil Nadu in the second week of January, is considered the cultural expres-

sion of the Tamils. The saffron party has taken up the programme.

festivals as a tool to reach out to a wider section. For, the DMK has been holding 'Equality Pongal' across the state on the first day of the festival on January 14, the first day of the Tamil month 'Thai'. Along with Shah, Union Minister L Murugan, State BJP president Nainar Nagendran, women's wing national president Vanathi Sreenivasan and MLA, K Annamalai participated in the programme.

Too Costly

A new political slogan is travelling fast across wealthy democracies: affordability. It is invoked with urgency, often paired with the language of crisis. Voters are told that prices are out of control, that everyday life has become unmanageable, and that something fundamental has gone wrong. The claim resonates emotionally. But as with many powerful political narratives, the truth is more complicated than the slogan suggests. Prices have undeniably risen in recent years, sometimes sharply.

Housing costs in major cities, childcare, healthcare, and food have all become more expensive, creating visible pressure points in household budgets. These increases are felt acutely because they affect items people buy frequently or cannot avoid. Yet when examined in aggregate, incomes in most advanced economies have risen faster than inflation over the same period. Measured broadly, purchasing power has not collapsed. In many cases, it has improved. This gap between economic data and public sentiment reveals something important about how people experience the economy.

Affordability is not assessed through national averages or wage indices. It is judged through lived encounters: the rent renewal that jumps unexpectedly, the grocery bill that feels higher than last month, the price of entry into home ownership that seems permanently out of reach. People anchor their sense of well-being to specific prices, not to abstract comparisons of income growth. Politics thrives in this space between perception and reality. Calls to "fix" affordability often begin by correctly identifying local distortions ~ shortages, regulatory bottlenecks, or supply constraints that push prices higher than they need to be.

But these insights are frequently followed by policy prescriptions that promise immediate relief while ignoring longer-term consequences. Price caps, subsidies without supply reform, or pressure on independent institutions may feel decisive, but they often worsen the very shortages they aim to address. The deeper tension lies in contradictory public demands. Voters want higher wages, but also lower prices. They want rising asset values for what they already own, and falling prices for what they hope their children can buy. They want protection from market volatility, yet also expect abundance, choice and innovation. These goals cannot all be met simultaneously without trade-offs. Affordability, then, is not a single economic condition but a political mirror.

It reflects anxieties about fairness, opportunity and security more than it does absolute living standards. The danger is not that these concerns are illegitimate, but that they are channelled into policies that confuse symptoms with causes. The challenge for governments is to resist slogans and confront structure: boosting supply where shortages exist, removing barriers that inflate costs, and being honest about the limits of what policy can deliver without unintended damage. Otherwise, affordability risks becoming not a solution to economic frustration, but a slogan that deepens it.

Development - World Bank and IMF

The artificial classifications of the World Bank and IMF at best serve their limited institutional purposes ~ to determine for eligibility of poorer developing countries for concessional loans, favourable trade terms etc., and for phasing these countries in or out of aid windows. They may provide a framework for organising global macroeconomic data but suffer from many serious flaws. They ignore inequality ~ the USA has a high per capita income of \$84000, but is a highly unequal country where the richest 1 per cent of households own almost 30 per cent of the nation's total wealth, while the bottom 50 per cent hold only about 3 per cent.

The top 10% own more than two-thirds of total wealth, and this share has increased steadily over the decades. In contrast, Japan, also an advanced economy, has low inequality. In our dream of Viksit Bharat, do we want an unequal society where a million billionaires account for 80 per cent of the nation's GDP? The classifications also ignore social outcomes ~ South Africa and Vietnam have similar income levels but vastly different inequality and employment structures. They ignore human development and economic structures, and cannot distinguish between a diversified modern manufacturing economy with a high skill base like China, an upper middle-income country, from Saudi Arabia, a high-income rentier state that is dependent on a single commodity, oil, and has very narrow domestic skill base.

A singly-commodity export dependent country has very different development prospects from a diversified economy, even though both may be at the same income levels. There are many such examples ~ South Korea vs. Kuwait, Norway vs. Qatar ~ all high-income countries yet vastly

different in diversification and skill. Nobody would advocate an economic structure like that of Saudi Arabia, Kuwait or Qatar for a Viksit Bharat. Vulnerability to external shocks, productivity growth and income and employ-

average living standards, and is necessary for development, but not a sufficient condition. Further, the Western concept of equating money with well-being is not relevant for India and many other countries.

Income gains do not

delivery is way below optimal, but everybody has access to healthcare and thanks to Ayushman Bharat, families do not fall into poverty due to medical expenditure. Welfare benefits reach every household without leakage, law and order is generally stable, and good quality roads and electricity are available even in the remotest villages.

By and large, institutions function as they should, elections are fair and free, and press is freer than in most countries. All these have been achieved at a low-income level, demonstrating that income is a weak proxy for the well-being of citizens. Developed countries also offer all these and quality is an equal concern with them too. The UK National Health Service is in a deep crisis where patients wait for weeks if not months to get an appointment. The public healthcare systems in the USA, many European countries, or South Korea are under deep stress due to inadequate finance, as are their public transportation systems which are "on the edge of a cliff" due to shrinking funding. The abrupt collapse of institutional mechanisms being seen in the USA now make our systems feel vastly superior.

One may then question why we should be considered undeveloped just because our per capita income is low? Of course, this is not to say that we have no problem ~ starting with unemployment and issues of quality, the inventory of our problems would be a long list, but addressing them is aspirational and a continuous, ongoing process. While sustained high growth and continuous rise in per capita income remain central to the idea of Viksit Bharat, the idea of Vikas must go much beyond these. It must be the vision of a future in

MISSION DEVELOPED INDIA

ment are all structural features invisible in income averages. They also ignore the capacity of the states to deliver public goods such as access to quality healthcare, education, social protection, etc. that depend not just on income but on state capacity and policy choices, which often lag income growth.

This brings us to the fundamental question, what exactly is development and what kind of development do we want for Viksit Bharat? True development must be multidimensional, encompassing not just purchasing power but health, education, opportunity, job, dignity, security, inclusion, and a whole lot of other things. Income of course is important as higher income levels are strongly correlated with better health outcomes, higher educational attainment, and greater state capacity. Even the UNDP's widely-reported Human Development Index (HDI) which gives equal weightages to income, health and education is imperfect because of this strong correlation ~ it automatically favours countries with higher income. As a single-number summary, income remains one of the most powerful predictors of

hunger in today's India, thanks to the food security provided by the State. The quality of education in public schools falls way short of expectation, but almost all children attend schools where they get at least one nutritious meal every day. Quality of public health

Morbi accounts for up to 90% of India's total ceramic exports

Morbi Ceramic Cluster to Be Showcased as a Special Zone at VGRC Kutch-Saurashtra Region

Morbi's ceramic industry provides direct and indirect employment to approximately 9 lakh people

Morbi Poised to Emerge as a Leading District of Gujarat in the Polypack Industry

Gandhinagar, 05 January 2026: Under the leadership of Hon'ble Chief Minister Shri Bhupendra Patel, Gujarat is gearing up for the second edition of the Vibrant Gujarat Regional Conference (VGRC) Kutch-Saurashtra region, to be held in Rajkot on 11 and 12 January 2026, with various programmes across the state. Among these, Morbi district has emerged as a key pillar of India's ceramic economy, accounting for nearly 90% of Gujarat's total ceramic production and ranking second globally.

Morbi's Journey from Potter's Wheel to Global Ceramic Hub

Morbi has today emerged as an important centre of the ceramic industry in India and abroad. In the early days, traditional pottery was practiced here, producing earthen pots, lamps, roof

tiles, and household clay utensils. The quality of the local clay and the skill of artisans gave Morbi's products a distinct identity. Subsequently, the wall clock industry was also established here.

With time, during the 1970-80s, the production of roof tiles and glazed tiles began, and gradually Morbi moved towards a modern ceramic industry. New technology, advanced machinery, and an entrepreneurial vision gave the city a new identity. Today, Morbi is globally renowned for the production of floor tiles, wall tiles, and vitrified tiles. Morbi's ceramic journey stands as an excellent example of progress rooted in tradition.

Morbi district of Gujarat emerges as India's ceramic hub

As part of VGRC, a special showcase of the Morbi ceramic cluster will be presented, highlighting advanced ceramics, value-added products, energy-efficient technologies, and the progress of the new Ceramics Park. The state government is proactively strengthening technology upgradation, automation,

renewable energy adoption, waste recycling, and logistics support for industries.

Driven by the enterprise of Morbi's entrepreneurs, supportive government policies, and a strong commitment to quality, Morbi has emerged as a source of national pride in India's

extended to beneficiaries over the last two years

Over the last two years, extensive and effective financial assistance has been provided in Morbi district under various government assistance schemes of the state government, which is proving to be a sig-

to public welfare and its vision of holistic development.

Contribution of approximately 80 to 90 percent in India's total ceramic exports

Morbi's ceramic industry is becoming a strong identity of Gujarat and India in

Morbi can also become the state's leading district in the polypack industry

Like the ceramic sector, Morbi district can also emerge as a leading district in the polypack industry in the near future. At present, a total of 150 PP woven product units are operational in Morbi district. Morbi's polypack industry currently produces approximately 5 lakh metric tonnes (MT) of PP woven fabric annually, with an estimated total annual turnover of ₹5,500 crore. The polypack industry presently provides direct and indirect employment to an estimated 15,000 to 20,000 people in Morbi.

Morbi district's wall clock industry holds a major share in India's wall clock production

Along with ceramics and polypack, Morbi has also developed a large wall clock and gift article industry, which accounts for the biggest share of India's wall clock production. There are approximately 150 to 200 wall clock units in Morbi district. This industry provides direct and indirect employment to an estimated 10,000 to 12,000 people, of whom 60% are women.

ceramic sector.

Morbi's ceramic industry provides employment to approximately 9 lakh people

The ceramic cluster of Morbi district is the world's second-largest cluster producing ceramic products. There are an estimated 1,200 ceramic units located in Morbi district, with a total annual production of approximately 60 lakh tonnes. These units provide new opportunities for self-employment, industry, improvement in living standards, and progress towards self-reliance, clearly reflecting the state government's commitment

the global market. As per estimates, exports worth approximately Rs. 15,000 crore were made from Morbi during the year 2024-25. Notably, Morbi alone contributes around 80 to 90 percent of India's total ceramic exports.

High-quality ceramic tiles and related products manufactured here are mainly exported to countries such as the United States, France, Germany, Oman, and Sri Lanka, clearly highlighting Morbi's global credibility and the strong position of the "Made in India – Made in Gujarat" brand.

Urban Disconnect

urban address as politically permanent. Millions who migrate from villages for work consciously retain their voter registration in their native places, where family ties, land, and local influence still matter more than the anonymity of the city. In that sense, the draft rolls are reflecting a choice as much as an omission. The city functions as an economic space, while the village remains the political anchor.

When door-to-door verification takes place in urban booth areas during working hours, migrant

workers are often absent, rentals change hands quickly, and documentation trails reality. What follows is administrative logic, not exclusionary design. What the revision process is also revealing is the scale of a long-ignored contradiction in voter behaviour. For years, electoral rolls quietly absorbed duplication created by migration, as individuals remained registered in their native villages while living and working elsewhere.

Parties with dense booth-level networks and constant voter engagement are better equipped to guide people through correction mechanisms. Those relying on past majorities or broad sentiment discover that organisational slack can quickly translate into electoral risk. Seen this way, the deletions do not represent exclusion but consolidation.

They mark the point

where administrative practice is finally catching up with social reality. Migrant voters are not being denied participation; they are being asked, perhaps for the first time, to make a clear choice about where their political citizenship resides. The discomfort this creates for urban centric parties like the BJP is understandable, but it is also unavoidable. But its outcomes underline a deeper institutional reality: India's political geography still lags behind its economic geography. Cities absorb labour at scale, but aren't sites of political belonging for millions who live and work within them. As migration reshapes India's cities, electoral politics will increasingly reflect this tension between economic movement and political rootedness. The draft rolls merely reflect where the vote truly belongs despite social mobility

Why Republicans are fleeing Congress

(Gns).

The midterm elections for Congress won't take place until November, but already a record number of members have declared their intention not to run – a total of 43 in the House, plus 10 senators. Perhaps the most high-profile person to depart, Republican Rep. Marjorie Taylor Greene of Georgia, announced her intention in November not just to retire but to resign from Congress entirely on Jan. 5 – a full year before her term was set to expire.

There are political dynamics that explain this rush to the exits, including frustrations with gridlock and President Donald Trump's lacklustre approval ratings, which could hurt Republicans at the ballot box. Rather than get swept away by a prospective "blue wave" favouring Democrats or possibly daunted by the monumental effort it would take to survive – many Republicans have decided to fold up the beach chair and head home before the wave crashes. As of now, two dozen Republican House members have either resigned from the House or announced their intent to not run for re-election in 2026. With only two exceptions – Republicans in 2018 and 2020 – this is more departures from

either party at this point in the election calendar than any other cycle over the past 20 years.

There is also growing concern within the House Republican caucus that Greene's announcement is a canary in the coal mine and that multiple resignations will follow. As a political scientist who studies Congress and politicians' reelection strategies, I'm not surprised to see many House members leaving ahead of what's shaping up to be a difficult midterm for the GOP. Still, the sheer numbers of people not running tells us something about broader dissatisfaction with Washington. Many planned departures are true retirements involving older and more experienced members. For example, 78-year-old Democratic congressman Jerry Nadler is retiring after 34 years, following mounting pressure from upstart challengers and a growing consensus among Democrats that it's time for older politicians to step aside.

Nancy Pelosi, the former speaker who will turn

86 in March, is also retiring. Sometimes, members of Congress depart for the same reasons other workers might leave any job. Like many Americans, members of Congress might find something more attractive elsewhere.

Retiring members are attractive hires for lobbying firms and corporations, thanks to their insider knowledge and connections within the institution. These firms usually offer much higher salaries than members are used to in Congress, which may explain why more than half of all living former members are lobbyists of some kind.

Other members remain ambitious for elective office and decide to use their position in Congress as a springboard for another position. Members of the House regularly retire to run for a Senate seat, such as, in this cycle, Democratic Rep. Haley Stevens of Michigan. Others run for executive offices, including governor, such as Republican Rep. Nancy Mace of South Carolina. But some are leaving Congress due to growing frustration with the job and an inability to get things done. Specifically, many retiring members cite growing dysfunction within their own party, or in Congress as a whole, as the reason they're moving on. In a statement announcing his departure in June, Sen. Thom Tillis, R-N.C., mused that "between spending another six years navigating the political theatre and partisan gridlock in Washington or spending that time with my family," it was "not a hard choice" to leave the Senate.

In addition, there are a few other factors that can help explain why so many Republicans in particular are heading for the exits leading up to 2026. The shifting of boundaries that has come with the mid-decade redistricting process in several states this year has scrambled members' priorities. Unfamiliar districts can drive incumbents to early retirement by severing their connection with well-established constituencies. In Texas, six Republicans and three Democrats – nearly a quarter of the state's entire House delegation – are either retiring or running for other offices, due in part to that state's new gerrymander for 2026. All decisions about retirement and reelection are sifted through the filter of electoral and partisan considerations.

WR COLLECTS OVER ₹155 CRORE AS FINE THROUGH INTENSIVE TICKET CHECKING DRIVES DURING THE PERIOD FROM APRIL TO DECEMBER 2025

Almost Rs/-3 Crore Recovered as fine from AC Suburban locals

In order to ensure hassle-free, comfortable travel & better services to all bona fide passengers over Western Railway, intensive ticket checking drives are carried out continuously over Mumbai suburban, Mail/Express as well as passenger trains & holiday special trains, so as to curb the menace of ticketless/irregular passengers. The highly motivated ticket checking team under the supervision of Senior Commercial Officers of Western Railway organized several ticket checking drives during the period from April to December 2025, thereby recovering an amount to the tune of ₹155.46 crore, which is around 49% higher than the corresponding period

last year, which also includes ₹41.26 crore from the month of December 2025, WR realised fines amounting to ₹ 3.95 crore through detection of 92 thousand cases. To prevent unauthorized entry in AC local trains, frequent surprise ticket checking drives are also being carried out. As a result of focused drives in AC locals, almost 91 thousand unauthorized passengers were penalized during April to December 2025 and ₹2.97 Crs. collected as fine, which is about 97% higher than the corresponding period last year. Such remarkable results are a testament to the dedication of Western Railway's commitment to curb unauthorized travel, enhance passenger experience and safeguard public

detection of 2.51 lakh ticketless/irregular passengers, including unbooked luggage cases, registering an increase of around 42% over the previous year's December figure. Also, in Mumbai Suburban section.

According to a press release issued by Chief Public Relations Officer, Western Railway, Shri Vineet Abhishek, in the month of December itself,

WR'S MAJOR BLOCK IN CONNECTION WITH WORK

OF 6th LINE OVER KANDIVALI - BORIVALI SECTION

Mumbai, To carry out the work in connection with the construction of the 6th line between Kandivali and Borivali section, Western Railway has undertaken a block of 30 days from the night of 20th/21st December, 2025, which will

continue up to 18th January, 2026. Due to this block, a few Western Railway trains will be affected.

According to a press release issued by the Chief Public Relations Officer of Western Railway, Shri Vineet Abhishek, a major block will be undertaken

during the night of 06th/07th January, 2026 for the insertion of Point No. 103 on the UP Fast Line at Kandivali. The block will be undertaken on the UP Fast Line from 00:00 hrs to 05:30 hrs and on the DOWN Fast Line from 01:00 hrs to 04:30 hrs.

Kannan Pattambi, Veteran Malayalam Actor and Film Production Controller, Passes Away At 62

(Gns). Malayalam film actor and production controller Kannan Pattambi passed away on January 4, 2026, and his funeral was held on January 5, 2026, at his home in Pattambi, Palakkad district. He was known for his roles in films like Pulimurugan, Keerthichakra, Vettam, Crazy Gopalan, Kandahar, Tantra, and 12th Man. He earned recognition for his versatility and ability to contribute meaningfully to both commercial blockbusters and content-driven cinema.

In addition to acting, Pattambi had a distinguished career as a production controller, working on films directed by Major Ravi, Shaji Kailas, V. K. Prakash, and Santosh Sivan, among others. He also took on responsibilities as an executive producer, coordinating complex production logistics and ensuring smooth film shoots.

Kannan Pattambi's death marks the loss of a familiar face and trusted professional in Malayalam cinema. His dual contributions as an actor and production controller created lasting links across films, directors, and production teams. From Pulimurugan to 12th Man, his body of work reflects a long-standing and multifaceted engagement with the Malayalam film industry, leaving behind a legacy that will be remembered by colleagues and fans alike.

Krishna Kishore, 45, a

notable filmography includes Pulimurugan, Punaradivasa, Ananthabhadram, Odiyan, Keerthichakra, Vettam, Crazy Gopalan, Kandahar, Tantra, and 12th Man. He earned recognition for his versatility and ability to contribute meaningfully to both commercial blockbusters and content-driven cinema.

In addition to acting, Pattambi had a distinguished career as a production controller, working on films directed by Major Ravi, Shaji Kailas, V. K. Prakash, and Santosh Sivan, among others. He

also took on responsibilities as an executive producer, coordinating complex production logistics and ensuring smooth film shoots.

Kannan Pattambi's death marks the loss of a familiar face and trusted professional in Malayalam cinema. His dual contributions as an actor and production controller created lasting links across films, directors, and production teams. From Pulimurugan to 12th Man, his body of work reflects a long-standing and multifaceted engagement with the Malayalam film industry, leaving behind a legacy that will be remembered by colleagues and fans alike.

Krishna Kishore, 45, a

notable filmography includes Pulimurugan, Punaradivasa, Ananthabhadram, Odiyan, Keerthichakra, Vettam, Crazy Gopalan, Kandahar, Tantra, and 12th Man. He earned recognition for his versatility and ability to contribute meaningfully to both commercial blockbusters and content-driven cinema.

In addition to acting, Pattambi had a distinguished career as a production controller, working on films directed by Major Ravi, Shaji Kailas, V. K. Prakash, and Santosh Sivan, among others. He

also took on responsibilities as an executive producer, coordinating complex production logistics and ensuring smooth film shoots.

Indore Water Contamination: 142 Patients In Hospitals; 20 New Diarrhoea Cases Found

(Gns).

As many as 142 persons are currently hospitalised, including 11 in ICUs, amid an outbreak of diarrhoea caused by contaminated drinking water in Indore, while 20 new patients were detected during screening of over 9,000 people in the Bhagirathpura area, the ground zero of infection. Health teams examined 9,416 individuals from 2,354 households during an ongoing survey in Bhagirathpura, where six persons have lost their lives due to contaminated water, and identified 20 fresh cases, officials said on Sunday.

The outbreak is under control now, they added.

Chief Medical and Health Officer Dr Madhav Prasad Haasan said a

team from the Kolkata-based National Institute for Research in Bacterial Infections (NIRBI) has

locals claimed that 16 persons, including a six-month-old child, died due to the diarrhoea outbreak.

arrived in Indore to probe the health crisis.

He said experts from NIRBI are providing technical support to the health department to contain the outbreak.

The administration has confirmed six deaths so far. Mayor Pushyamitra Bhargava had put the death toll at 10, whereas

Amid the outrage over deaths, the Congress staged bell-ringing protests across Madhya Pradesh demanding the resignation of senior minister Kailash Vijayvargiya over the usage of the word "ghanta" while responding to reporters' questions about the developments in Indore.

Vijayvargiya sparked a

row on the night of December 31 when he responded with the expression "ghanta" to a question by reporters on camera when asked about the water contamination crisis.

The Congress demanded a judicial inquiry and sacking of Vijayvargiya, who holds the Urban Development and Housing portfolios, since Bhagirathpura is part of his Indore-1 assembly constituency.

State Congress president Jitu Patwari threatened to launch an agitation on January 11 if the party's demands for rectification measures were not met.

He demanded registration of a culpable homicide case against Indore Mayor Pushyamitra Bhargava and civic officials concerned.

Deputy Chief Minister Shri Harsh Sanghvi's interaction with leading industrialists of Saurashtra-Kutch Region in Rajkot

Deputy Chief Minister appeals to industrialists to participate in the Vibrant Gujarat Regional Conference

Under the leadership of Chief Minister Shri Bhupendra Patel, the Gujarat Government always stands with industries for the purpose of holistic development of the state: Shri Harsh Sanghvi

Deputy Chief Minister Distributes Rs. 956.51 Crore in Incentives to 10,435 Entrepreneurs; Distributes Approval Letters Worth Over Rs. 671 Crore to 137 Industrialists

VGRC to Become the Gateway to a New Era for the Industrial Sector of the Saurashtra-Kutch Region: In-charge Minister Shri Jitubhai Vaghani

(Gns).

Deputy Chief Minister Shri Harsh Sanghvi today interacted with leading industrialists of Saurashtra-Kutch region in

Rajkot. On the occasion, he reaffirmed that with the objective of the state's holistic development, the Government of Gujarat, under the leadership of Chief Minister Shri Bhupendra Patel, continues to extend full support to the industrial sector. He also urged industrialists to enhance investments in the state and contribute to accelerating Gujarat's development by actively leveraging platforms such as the Vibrant Gujarat Regional Conference.

On this occasion, incentive assistance worth Rs. 956.51 crore was distributed to 10,435 industrial entrepreneurs by the Deputy Chief Minister, and

approval letters worth more than Rs. 671 crore were distributed to 137 industries under various schemes of the Industries Department.

tive approach, the government is continuously working to resolve industry-related issues so that businesses can invest easily, increase production, and grow. He said that Rajkot is Gujarat's growth engine and is rapidly advancing in investment, infrastructure, and industrial development. In the coming days, VGRC will be held in Rajkot and will be inaugurated on 11 January by Prime Minister Shri Narendra Modi. The conference will provide a major platform and strong momentum to industries in Rajkot and the entire Saurashtra-Kutch region.

Referring to the government's efforts to develop small industries, he said that MSMEs play a vital role in development. Therefore, under the leadership of Chief Minister Shri Bhupendra Patel, the state

CDO held a meeting with the Road Safety Committee, ARTO made drivers aware

Mathura. Under the Road Safety Month, a seminar was organized by Sandeep Chaudhary Passenger Tax Officer under the direction of ARTO Rajesh Rajput with truck union officials and drivers. PTO made everyone aware about 100% adherence to road safety rules and regulations, expressway speed limit, and also administered the oath of road safety. PTO also advised to have two drivers on long distance journeys and also advised not to travel in fog in the morning.

On the other hand, ARTO Rajesh Rajput issued challans for 79 vehicles speeding on the expressway and also gave strict instructions to the drivers to follow the speed limit at the toll. At ARTO office, Township Mathura, ARTO Rajesh Rajput and Neetu Singh distributed

Information was also given about the importance of Golden Hour after the

thorized on the land identified near Vaishno Devi Temple in Vrindavan area should be stopped by the Transport and Police/Traffic Department. Will be visited and monitoring will also be done through CCTV cameras. Rotation wise duty will also be done by police constables at the said site. Apart from this, the Chief Development Officer directed the officials of YIDA and NHAI to install signages as per the standards on the black spots, which should be clearly visible. Regarding school vehicles, sir instructed that by organizing fitness camps, school vehicles should be made fit as per the standards and programs should be organized in schools under the National Road Safety Month.
